**ANTI-
SIEZE**

Permabond Anti-Sieze lubricating compound is designed to prevent corrosion, seizure and galling of metal parts under the most extreme conditions of heat, pressure and contamination. Permabond Anti-Sieze forms a fine, protective film that can not be burned off or completely removed by abrasion. This protective coating is resistant to fresh or salt water, even after extended exposure to the elements.

77915

**PIPE
SEALANT
WITH TEFLON**

Permabond Pipe Sealant LH050 seals pipe joints instantly and when cured exceeds the burst rating of the pipe. LH050 permits dis-assembly with normal tools for scheduled maintenance. It works on most metals, withstands temperatures up to 400° F and is recommended on pipe diameters up to 2".

77931

**BOLT and
STUDLOCKING
ADHESIVE**

Permabond Bolt and Studlocking Adhesive is a high strength adhesive for permanent assembly. It makes a lower cost Class 2 stud assembly stronger than a Class 5 stud, and it eliminates the need for doublelocking or welding. The HM12B also seals studs against corrosion and leakage.

77910

1

**910°
ADHESIVE**

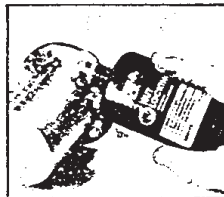

Permabond 910 bonds metals, plastics and rubber. It is especially well suited for metal bonding, providing superior strength. Permabond 910 resists long term exposure to temperatures up to 190° F and short term peaks of up to 300° F. Handling strength is reached as quickly as 10-30 seconds.

77922

**NUTLOCKING
ADHESIVE**

Permabond Nutlocking Adhesive is the general purpose Threadlocker and meets 80% of all nut and bolt applications. Nutlocking Adhesive is recommended for locking nuts and bolts that require dis-assembly for service or repair. The thixotropic viscosity keeps the adhesive in the threads during assembly for optimum performance. Parts may be dis-assembled with normal tools.

77926

**WICKING
ADHESIVE
SEALANT**

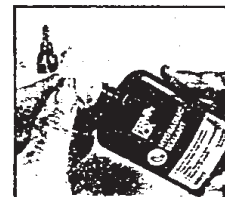

Permabond Wicking Adhesive is a low viscosity penetrating product formulated for post assembly. Parts may be adjusted or aligned after the adhesive is applied. As a preventive maintenance tool, it can lock and seal fasteners without dis-assembly. HL126 is also used to seal weld porosities.

77934

**HYDRAULIC
SEALANT**

Permabond LM012 Hydraulic Sealant contains no fillers or particles to contaminate systems. LM012 seals hydraulic fluid lines against leakage from shock, vibration and pulses. Hydraulic Sealant is a liquid which cures to a solid seal, as strong as the working pressure of the line. It allows adjustment and alignment of the fittings after application.

**Magic
Metal™**

A tough wear resistant bronze two part resin that cures and applies with the ease and simplicity of a one part resin. Magic Metal™ completely eliminates the fears that some users occasionally have about proper mixing with two part resins.

- will not rust
- non magnetic
- adheres to many surfaces and cures underwater
- fast - workable for 5 minutes, sets in 15 minutes
- use as both an adhesive
- no measuring or mess - out of what you need
- chemical and abrasion resistant
